SEE IT IN ACTION

Customizable Interactives

Create and embed on-brand interactive elements with ease, using the Loree Interactives add-on! This is an optional add-on module to the Loree course design tool.

A Touch of Interactivity in Every Course

With zero coding experience, users can create customized, accessible and rich engaging online courses with ease.

Accordion

Reduce the amount of text presented to users at a glance, whilst shortening pages and reducing scrolling.

Tabs

Primary goal of tabs is to present users with a grouped and layered view of content, saving valuable screen real estate.

Buttons

Making it easy and intuitive for learners to take action or make a choice with a single tap.

Multiple Choice

Allows users to easily build in a quick skill check. Optionally, data can be collected for learning analysis.

Flip Cards

Take advantage of the movement/motion element within this interactive to increase learner engagement.

Image & Video Slider

Helps to pace delivery of visual information, whilst reducing scrolling.

'Click' and Reveal

Allows users to offer additional information upon interaction. Great for a quick skill check.

Template Packs & Course Build Services

Loree empowers educators, learning designers and independent organizations to build entire pages within Canvas in minutes, giving precious time back to focus on what they do best: Educate.

Setting You Up for Success

Need a helping hand to get started with Loree course designer? We can support you with branded template packs to setup your educators and learning designers for success.

The Crystal Delta Course Building service supports education institutions with the creation of engaging online course content.

This service covers the following key pillars of success for online learning:

Mobile

Making sure the content is easy to navigate and read on mobile phones and tablets

Interactive

Interactive content encourages engagement, and interactions can be measured

Video

Outside the classroom, the optimum way to consume learning content is via video

Accessibility

Online content should be accessible by learners who are differently abled
